2 x 2 Gauze	Extractor	Mirror
Gloves	Ageless Stem Cell & Peptide Mask	Hot Cabbie w/2 Towels
Sunnies Goggles to cover eyes	Eye Cream	1 4"x4" Gauze
Serum(s)	SPF	

Procedure

CLEANSE - Steam may be used during cleansing. Remove makeup and impurities with a Gel Based Cleanser for Oily Skin. Cleanse the skin twice - removing the second cleanse with steam towel.

PREP - Prep the skin using **DermaplanePro AHA/BHA Skin Prep Solution**. This removes cleanser and makeup residue. The Salicylic and Lactic acids in the prep solution will penetrate to begin the exfoliation process.

ANALYZE - Cover the eyes with dry eye pads or Sunnies Goggles. Position and turn on mag lamp. Discuss skin analysis with the client. Tweeze any course hairs on chin.

NOURISHE DERMAPLANING OIL - Apply 1 pump of Nourishe to client's face and neck. Be careful to avoid getting in eyes. Nourishe is ok on lips. Nourishe should be a fine film on the skin.

DERMAPLANE - Be sure to wear gloves while dermaplaning and during extractions. As you work, gently wipe blade on gauze to remove dead skin cells and vellous hair. When you are finished dermaplaning, check for any missed areas, especially on the cheeks and upper lip.

NUPEEL ENZYME - On dry skin, apply a nickel size amount of NuPeel Natural Enzyme. Massage into the skin using light to medium pressure. The enzyme will apply like a gel and quickly liquify. After about 30 seconds, the enzyme will begin to form beads with the remaining dead skin cells that were loosened during dermaplaning. Keep massaging until the enzyme begins to lose its slip (2-3 minutes). Remove with warm steam towel.

EXTRACTIONS - The NuPeel Enzyme contains plant enzymes that digests proteins and oils in the skin. This helps relieve congested and asphyxiated skin by removing the barrier that traps oil, dirt and impurities in the follicle for easy extraction. Using the Rxtactor, gently remove impurities from the skin.

TONE - Tone skin using a hydrating toner in areas of extractions.

MASK - Ageless Stem Cell & Peptide Mask is calming & nourishing to the skin. Lay mask on face. Then Immerse 1 4"x4" gauze in remainder of serum in packet and apply to neck. Time for 10 or more minutes (mask can be left on for 30 minutes). Lift mask and gauze to remove. Massage in remaining serum.

FINISHING PRODUCTS - Apply Serum(s) ie., growth factors, stem cells, peptides, melanin suppressants; Moisturizer, Eye Cream and SPF.
